## CASE STUDY

# The Debt Support Company

### KEY POINTS

- Cloud-based computing
- Increased efficiency
- Supporting growth
- No capital expenditure
- Flexible working
- Minimised downtime
- Email protection
- Fixed cost

### The Parachute Solution

Parachute IT's Cloud Platform was the ideal solution for The Debt Support Company, providing a cost-effective IT system with the flexibility to adapt quickly and easily. The Debt Support Company are now able to add and remove resources at will, only paying for what they need on a fixed cost per user per month.

Staff can securely connect to data, emails and business applications from anywhere at anytime, improving productivity and ensuring a quick response to clients even when out of the office.

The company's infrastructure is protected by Parachute IT's systems, which scan every message for spam and viruses before it reaches the users inbox.

### The Parachute Difference

Along with improving speed, uptime and availability of data, one of the greatest advantages of Parachute IT's Cloud Platform is its online data backup service, powered by world leading cloud software provider, Asigra. For complete peace of mind, The Debt Support Company's business data is securely backed up and any lost files can be recovered in seconds.
